Email 1 — Assignment Extension Request

Subject: Assignment Extension Request- Sanskriti

Dear Professor

I hope this email finds you well.

I am writing to respectfully request a brief extension for the upcoming assignment on Newton Forward and Backward Interpolation. Due to **heavy overlap of term-end project deadlines**, I need a little more time to ensure my calculations and code are up to standard.

Would it be possible to submit my assignment by **3rd April, Friday** instead of the original deadline?

Thank you very much for your time and understanding. I look forward to your response.

Sincerely,

Sanskriti

Email 2 — Internship Inquiry

Subject: Inquiry Regarding Summer Artificial Intelligence Internship - Sanskriti

Dear Co-ordinator,

I hope you are having a good week.

My name is Sanskriti, and I am a first-year Artificial Intelligence student writing to express my strong interest in a summer internship with **Meta**. I have been following your team's work in **Machine Learning** and would love the opportunity to contribute and learn from your developers.

Through my coursework and independent projects, I have been building a solid foundation in Python, C++, and computational problem-solving. I am highly motivated to apply my academic knowledge of data structures and algorithms to real-world challenges in an industry setting.

I have attached my resume for your review, and you can view some of my recent coding projects on my GitHub profile here: **https://github.com/Sanskriti161**

Are there any open summer internship roles or shadowing opportunities available for first-year students on your team? I would greatly appreciate the chance to discuss how my skills and eagerness to learn could be a good fit.

Thank you for your time and consideration.

Best regards,

Sanskriti
